DILATION POLICY: Dr. Brady and Dr. Adams consider dilation of the pupils an important part of a complete eye examination. The purpose of pupil dilation is to enable the doctor to examine the inside of the eye more thoroughly. It helps with detection of eye diseases such as cataracts, glaucoma, and retinal disorders. It also helps with monitoring and detecting systemic diseases such as hypertension and diabetes. Drops are used to dilate the pupils, which causes temporary sensitivity to lights and difficulty with reading or near work for an hour or more. If you have a reason that you cannot be dilated today, you may schedule the dilation for another time. It may be necessary for patients showing signs of eye disease and young children to be dilated at today's visit. Dr. Brady and Dr. Adams recommend dilation every year for patients under the age of 9, over the age of 50, and for all patients with a systemic disease like diabetes. Dilation is strongly recommended for ALL new patients. Pupil dilation does NOT require an additional fee and is INCLUDED in the exam fee.

PLEASE CHECK ONE:

I would like pupil dilation today for a comprehensive examination.

I do not want my pupils dilated and understand that refusing this procedure will make early detection of eye diseases more difficult.

Visual Field Screening Testing Consent: Our Office has an instrument, which enables us to provide a more thorough peripheral visual field screen analysis. Visual Field Screening can assist us in early detection of glaucoma, retinal problems, and neurological diseases (such as optic nerve disease). The fee for this procedure is \$10.00 and is NOT covered by insurance companies. If you have any questions we will be happy to discuss this in more detail.

PLEASE CHECK ONE:

I DO want the Visual Field Screening

Though it may be in my best interest, I DO NOT want the Visual Field Screening

Retinal Photo Testing Consent: As part of your eye exam, we recommend a special diagnostic procedure called Retinal Imaging. This procedure consists of capturing an image of the back part (retina) of your eye. This is not an X-Ray or Ultrasound procedure and nothing will touch your eye. We are simply taking a digital picture. This permanent record is very valuable in assessing the current health of your eye and for safe guarding the health of specific structures of your eye such as the retina, optic nerve, macula and blood vessels. It will also serve as an initial point from which to compare, as we follow your health in subsequent years. The fee for this additional part of your eye exam is \$25.00. Depending on your diagnosis, this test may not be covered under your medical insurance or Medicare. Retinal images are also not covered under most vision plans.

PLEASE CHECK ONE:

Yes, I want to have retinal photos taken of my eye.

No, I DO NOT wish to have retinal photos taken.
